

Non-Executive Chairman and Non-Executive Director Appointments

GLOBAL HEALTH PARTNER PLC (AIM:GHP), (“GHP” or “the Company”) announces that Urban Jansson has agreed to take on the role of Non-Executive Chairman of the Board and also that Dr Joachim Werr, a director of Investor Growth Capital Europe, a 15.6% shareholder in GHP, joins the Board with immediate effect.

Mr Jansson, who joined the Board in September as independent Non-Executive Director takes over the Chairman’s responsibilities previously carried out by Per Batelson, who is continuing in his role as Chief Executive. With the successful establishment and development of GHP’s Service Lines since its float in August 2006, both roles have expanded in importance and the Board believes it is an appropriate moment to separate these responsibilities in line with its original intentions at listing.

Dr Joachim Werr, of Investor Growth Capital Europe, also joins the GHP Board as the representative of Investor Growth Capital Europe following their acquisition of a 15.6% interest in GHP on December 21 2007. Joachim has a medical background and is currently a Director of Heartscape Inc. He has held no other directorships during the last five years. Prior to joining Investor Growth Capital Europe, Joachim was a practicing physician at Karolinska University Hospital in Stockholm and a McKinsey consultant in the Healthcare Group.

Per Batelson, Chief Executive of GHP commented: “We are delighted with both these appointments which are designed to assist the next stages of development of the Company. I should like to thank Urban, with all his considerable experience in this area, for taking on control over Board matters, while I focus on the execution of the GHP Service Line growth strategy. The support of Investor Growth Capital Europe, given their interest in the Company will be important during this next development phase and we are excited to welcome Dr Joachim Werr to the Board as their representative, he brings considerable medical expertise and investment experience to the Board.”

Note to Editors:

Global Health Partner PLC (‘GHP’) is the AIM listed provider of Specialised Healthcare Services (Service Lines) operating in Sweden and the UK following its August 2006 flotation and initial fund raising. GHP has invested in acquisitions and start-up clinics in selected clinical areas of spine surgery, dental implant surgery, bariatric surgery and obesity treatments, and orthopaedic surgery and sports-medicine, with a view to creating Service Lines in each by rolling-out a standardised service model. GHP judges that these chosen Service Lines offer real growth opportunities and good margins both in the Scandinavian market in which it currently carries out its business and the wider European healthcare markets.
